COVER LETTER

To Who It May Concern;

I am writing to express my interest in the architect position with your company. I am also very excited about the possibility of working for a reputable and growing company like yours, where I will have the opportunity to perform architectural design and planning in a professional setting.

As you can find from the enclosed resume, I have done art and technical education from the University of architectural studies. I had talents and skills that are overrated for technical education; I changed my school by the teacher's advice.

Over the past two years, I have been employed by Pracownia Koncept, where I have worked on various residential, commercial, and retail mixed-use projects. Since working for this company, I have managed projects from the BIM design stage right through to completion. My enclosed CV clearly shows my knowledge of design, detail resolution, BIM modelling and my ability to utilize Archi CAD, Revit, 3D Max, and other graphics communication programs.

I am a dynamic and ambitious architect who possesses the design and development flair needed to plan, coordinate and be involved in all phases of an architectural project. On top of all of this, I have superb communication skills and client liaison ability, as well as a solid technical and aesthetic understanding of building regulations.

With my degree in Architecture and my hands-on experience in this field, I am confident that I have those specific qualities that you are looking for in a candidate.

I appreciate your consideration of my application and look forward to discussing this opportunity with you in person. Please feel free to contact me anytime to arrange an interview.

Yours sincerely,
EMRE APAK
